5) Abstract

The purpose of our invention is to enable both shoppers and shippers to shop and settle online transactions at ease and with convenience.

The object is to carry on the business of e-commerce services, offer full range of e-commerce services to corporate customers and end users.

The e-commerce services include providing website design, content development, hosting and webcasting, information technology security consulting, business intelligence and internet solutions.

The process is easily understood, powerful, and efficient.
