(54) Title: APPARATUS, METHOD, OR COMPUTER PROGRAM FOR PROCESSING AN ENCODED AUDIO SCENE USING A PARAMETER CONVERSION

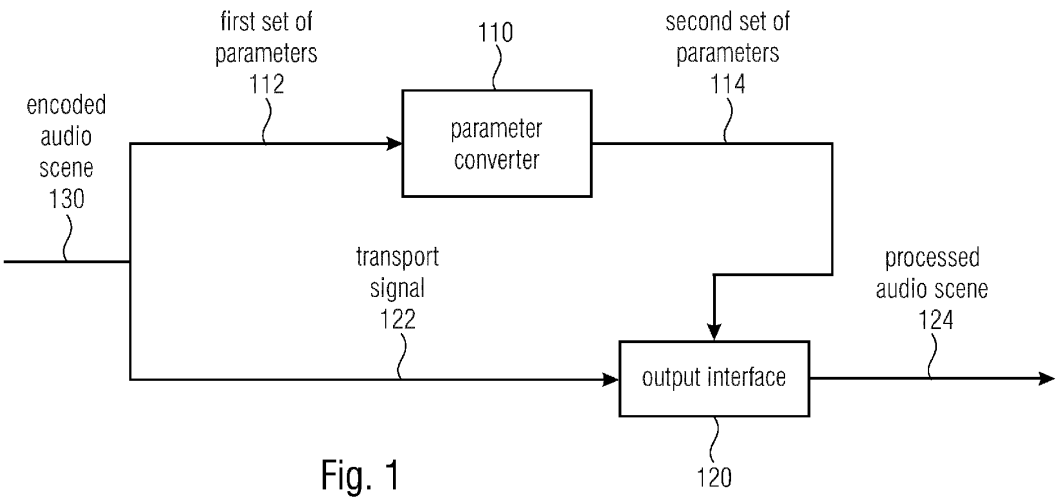

Fig. 1

(57) Abstract: An apparatus for processing an encoded audio scene (130) representing a sound field related to a virtual listener position, the encoded audio scene comprising information on a transport signal (122) and a first set of parameters (112) related to the virtual listener position comprises a parameter converter (110) for converting the first set of parameters (112) into a second set of parameters (114) related to a channel representation comprising two or more channels for a reproduction at predefined spatial positions for the two or more channels, and an output interface (120) for generating a processed audio scene (124) using the second set of parameters and the information on the transport signal (122).
