HEAD MOUNTED UMBRELLA AND METHOD OF MANUFACTURING THE SAME

ABSTRACT

A head mounted umbrella and a method thereof, which reduces its manufacturing cost and time and is stably held on a user's body without shaking, and which prevents a user's face from getting wet with rain water, and is hung on a hanger, is disclosed. The head mounted umbrella includes a hood part having a front opening, a body covering part manufactured in such a way that a circular basic cloth having a central opening and at least one cut radial portion is prepared, and adjacent radial edges of the basic cloth are coupled to each other to form a skirt shape, and the skirt-shaped cloth is coupled to a lower edge of the hood part, and an annular elastic ring is coupled to an outer peripheral edge of the body covering part by an attaching cloth strip.
