Claims:

1. A flavour composition comprising:

a characterizing herb flavour selected from lettuce, coriander, parsley or basil; and

a taste modifying composition including at least two aliphatic amino acids; at least one additional amino acid selected from the group consisting of acidic, amidic, basic, aromatic, hydroxylic, sulfur-containing amino acids and mixtures and salts thereof; at least one organic acid; at least one sugar and at least one mineral;

wherein the at least one organic acid is selected from the group consisting of malic acid and succinic acid and mixtures thereof; and wherein the taste modifying composition increases the intensity of the organoleptic properties of a consumable.

2. The composition according to claim 1, wherein the at least two aliphatic amino acids are selected from the group consisting of glycine, alanine, valine, proline, leucine, isoleucine, gamma-aminobutyric acid and mixtures and salts thereof.

3. The composition according to claim 1, wherein the acidic amino acids are selected from the group consisting of aspartic acid, glutamic acid and mixtures and salts thereof.

4. The composition according to claim 1, wherein the amidic amino acids are selected from the group consisting of asparagine, glutamine and mixtures and salts thereof.

5. The composition according to claim 1, wherein the basic amino acids are selected from the group consisting of histidine, lysine, arginine and mixtures and salts thereof.

6. The composition according to claim 1, wherein the aromatic amino acids are selected from the group consisting of phenylalanine, tyrosine, tryptophan, histidine and mixtures and salts thereof.

7. The composition according to claim 1, wherein the hydroxylic amino acids are selected from the group consisting of serine, threonine and mixtures and salts thereof.

8. The composition according to claim 1, wherein the sulfur-containing amino acids are selected from the group consisting of cysteine, methionine and mixtures and salts thereof.

9. The composition according to claim 1, wherein the at least one mineral is selected from the group consisting of potassium, sodium, calcium, magnesium and salts thereof.

10. The composition according to claim 1, further comprising a filler and a flowing agent.

11. The composition according to claim 1, wherein the composition includes from 0.01% to 1% by weight of the characterizing herb flavour.

12. The composition according to claim 1, wherein the composition includes from 0.01% to 1% by weight of the taste modifying composition.

13. A consumable comprising the flavour composition according to claim 1.
