(54) Title: CONTAINER APPLICATION FOR MICROSERVICES FRONT END DESKTOP

FIG. 4

(57) Abstract: A method and a system for providing a container application for a servicing platform are provided. The method includes: displaying, at each of a plurality of workstations, a user interface; receiving, from a first user via the user interface, a first software application; receiving, from a second user via the user interface, a second software application; and facilitating a use of each of the first software application and the second software application by each of the first user, the second user, and at least a third user via a container application that provides access to a plurality of software applications. The user interface may include a microfront end that implements a plurality of microservices that correspond to a subset of the plurality of software applications.
