(54) Title: A DELIVERY SYSTEM

(57) Abstract: The present invention relates to a delivery system comprising a core and a membrane encasing said core, wherein said core and mem-brane consist essentially of an elastomer composition and said core comprises at least one therapeutically active agent. The delivery system is characterized in that the membrane comprises at least one regulating agent. The invention also relates to a method for controlling the release of at least one therapeutically active agent from a delivery system.
