(54) Title: A METHOD FOR GENERATING HAPTIC EFFECTS AND A HAPTIC SYSTEM

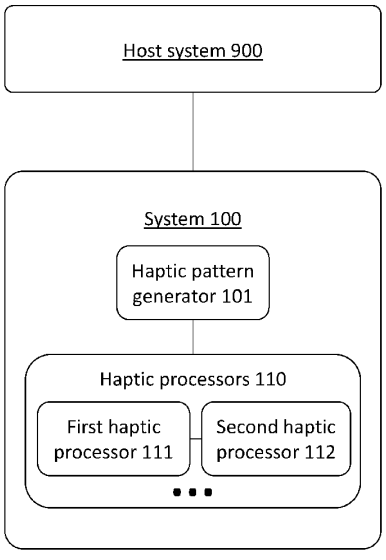

FIG. 1

(57) Abstract: In some aspects, a method for generating haptic effects include: generating and transmitting a combined haptic signal that includes a plurality of signals having first to N-th signals, each of the first to N-th signals having a signal identifier, wherein N is an integer greater than or equal to 2; receiving the combined haptic signal by a first haptic processor of at least one group of haptic processors, each group of haptic processors including first to N-th haptic processors; and relaying by the first haptic processor of the at least one group of haptic processors a first modulated signal to the second haptic processor of the at least one group of haptic processors, wherein the first modulated signal is modulated based on the combined haptic signal and the first signal of the plurality of signals.
