(54) Title: THREE-WHEELED SKATEBOARD SYSTEM AND METHOD

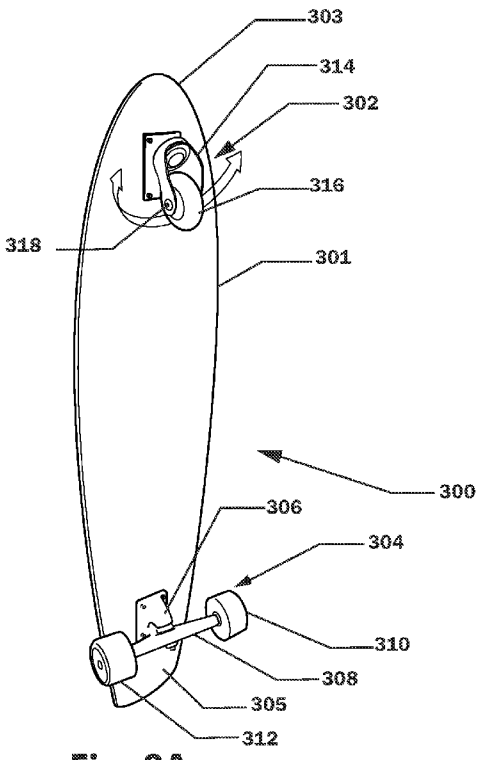

Fig. 3A

(57) Abstract: A system and method for a skateboard and for propelling the skateboard. The skateboard system (300) includes a board including a first end and a second end. The first end offsets from the second end, and the second end defines a board plane. The skateboard system (300) also includes a truck assembly (304) attached near the first end of the board and a caster assembly (302) attached near the second end of the board. The caster assembly (302) has a caster pin (604) at an angle with respect to the board plane. The caster assembly includes a caster fork supporting a caster wheel and the caster fork can translate radially about the caster pin.
