

ABSTRACTELECTRONIC TABLETS

5 An electronic tablet (1) for receiving hand written input via an
input pen (14), including a receptacle (23) for the pen (14) and a
detector (31, 32) operative to detect the presence of the pen (14) in
the receptacle (23). Preferably, a warning signal generator (38) is
also provided to generate, at appropriate times, a warning signal
10 indicating absence of the pen (14) from the receptacle (23).
