(54) Title: COMMUNICATION METHOD AND COMMUNICATION APPARATUS

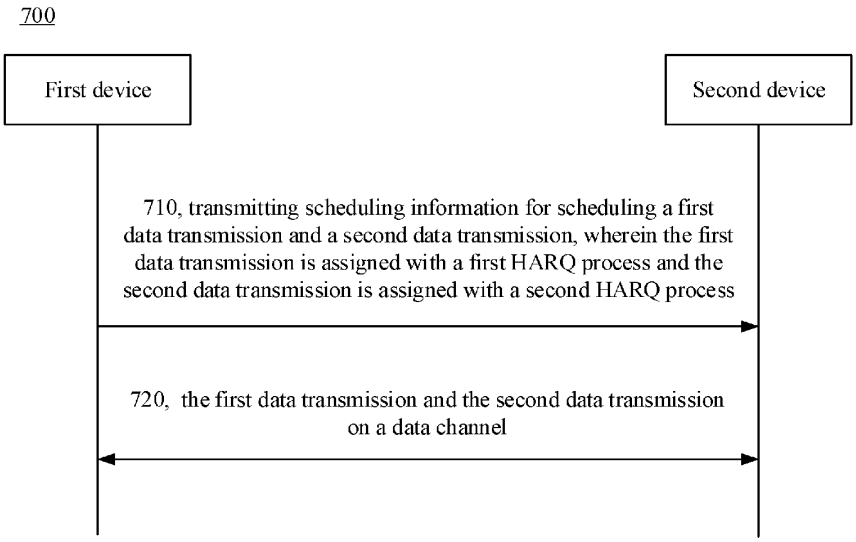

FIG. 7

(57) Abstract: Implementations of the present application provide a communication method and a communication apparatus. The method includes: different data transmissions corresponding to different hybrid automatic repeat request (HARQ) processes can be communicated on the same data channel and scheduled by scheduling information. According to the method, when different data blocks arrive at the same time, the different data transmission can be scheduled together and carried on the same data channel.Therefore, the method is used to reduce transmission latency and fully utilize resources.
