CLAIMS

1. A functional briefs for men, comprising:

a lining cloth, wherein an opening part for penis for containing the penis is formed at a center of the lining cloth to separately put the penis;

a containing cloth connected to a front part of the lining cloth and including first, second, and third curved parts, the containing cloth having a pocket shape made of the first curved part at an upper part, the second curved part at a centre area, and the third curved part at a lower part, the containing cloth including a first containing part for penis and a second containing part for scrotum in one space, the first and second curved parts defining the first containing part for penis, the third curved part defining the second containing part for scrotum, the first, second and third curved parts defining a volume of the pocket shaped containing cloth bigger than the volume of the penis and scrotum;

a front cloth forming a front part of the briefs, left and right edges of the front cloth located at its center being connected with the left and right sides of a connecting part of the containing cloth, the left and right edges of the front cloth being connected with the left and right sides of the lining cloth;

a rear cloth which is connected to the left and the right side of the front cloth and forms a rear part; and

an opening part for scrotum which is formed between the rear cloth and the

lining cloth wherein a lower part of the front cloth is connected to a lower part of the rear cloth and the connecting part of the containing cloth, and a vertical length of the lining cloth is shorter than a vertical length of the containing cloth.

2. The functional briefs for men according to claim 1, which further comprises a middle cloth wherein the middle cloth is inserted between the containing cloth and the lining cloth, has the same overall length of the lining cloth, and a first curved part and a second curved part is formed by folding the left and the right side of a cut part in an upper center based on the symmetry line and connected to the connecting part to help the penis to put through the containing cloth.

3. The functional briefs for men according to claim 1, further comprising a separating cloth formed between the opening part for penis and the opening part for scrotum .

4. The functional briefs for men according to claim 1, which further comprises:

a bottom cloth wherein one part of the bottom cloth is connected to the lower part of the front cloth, and the other part of the bottom cloth is connected to the lower part of the rear cloth; and

wherein the opening part for a scrotum is formed between the lower part of the lining cloth and the bottom cloth.
