(54) Title: INPUT DEVICE

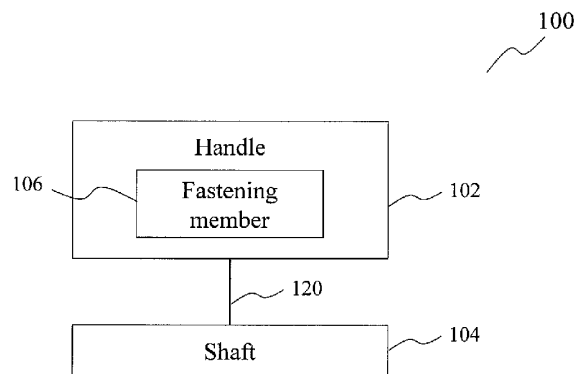

FIG. 1

(57) Abstract: According to various embodiments, there is provided an input device including a handle configured to receive a force exerted by a user; a shaft coupled to the handle such that the force exerted on the handle is at least partially received on the shaft; wherein the handle is displaceable along a height of the shaft; wherein the handle includes a fastening member releasably biased to exert a force on an upper portion of the shaft in a direction at least substantially perpendicular to the height of the shaft.
