ABSTRACT OF THE DISCLOSURE

Method of Manufacturing Glass Substrate, Glass Substrate Manufactured by the Method, and Magnetic recording Medium Using the Glass Substrate

An object of the present invention is to provide a method of manufacturing a glass substrate containing alkali metals. A glass substrate manufactured by the method exhibits excellent performances including durability by virtue of suppressing elution of alkali metals.

A method comprises a step of immersing a glass material in an aqueous solution containing a formate to suppress elution of component of the glass material.
