ABSTRACT

GAME TOKEN MANAGEMENT SYSTEM

A game token management system includes; a game token tray (17) for storing game tokens of a dealer; a card distribution device (3) that determines a result of a game; a management control device (50) that determines a target and an amount bet by a player and an amount of the game tokens held in the game token tray (17) and determines whether a change of the game tokens in the game token tray (17) after an end of the game is accurate or inaccurate; and an indicator lamp (173) that is turned on or off according to determination of the management control device (50).
