CLAIMS

1. A composition for raising a deep body temperature, comprising one or two or more compounds selected from the group consisting of a lophenol compound and a cyclolanostane compound as an active ingredient.

2. The composition for raising a deep body temperature according to claim 1, wherein a composition comprising one or two or more compounds selected from the group consisting of a lophenol compound and a cyclolanostane compound in an amount of 0.00001% by mass or more is used as an active ingredient.

3. The composition for raising a deep body temperature according to claim 1 or 2, wherein the composition for raising a deep body temperature is used for preventing and/or improving a disease caused by a lowering in deep body temperature.

4. The composition according to any one of claims 1 to 3, wherein the composition is a food and drink composition, or a pharmaceutical composition.

5. Use of one or two or more compounds selected from the group consisting of a lophenol compound and a cyclolanostane compound, in production of a composition for preventing or improving a disease caused by a lowering in deep body temperature.

6. One or two or more compounds selected from the group consisting of a lophenol compound and a cyclolanostane compound, for use in preventing or improving a disease caused by a lowering in deep body temperature.
