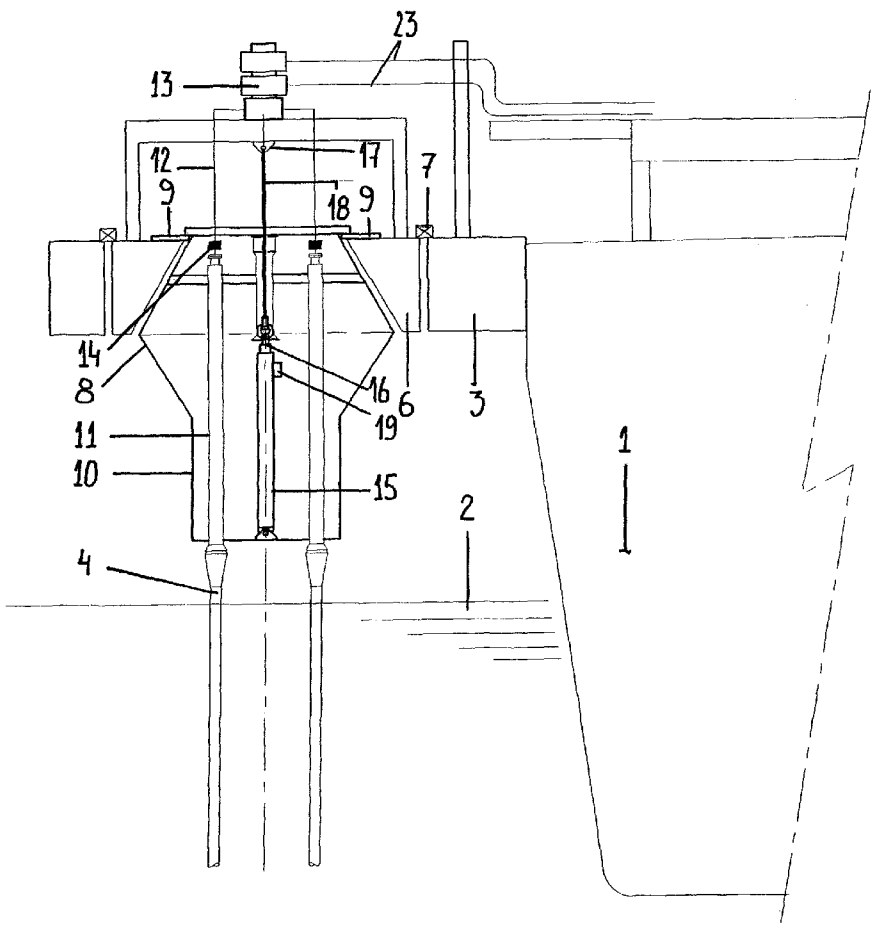
(54) **Title:** DISCONNECTABLE MOORING SYSTEM



(57) **Abstract:** A disconnetable mooring system is provided, comprising a vessel (1) with an outrigger (3) supporting a riser assembly (4) in a disconnectable manner, .which riser assembly is provided with a riser top body (8) which by means of disconnectable latching means (9) is attached to the outrigger. The riser top body additionally is connected to the outrigger by means of a braking device (15) for temporarily controlling the downward speed of the riser top body after disconnecting the latching means, which braking device comprises a first end permanently connected to one of the riser top body and outrigger, and a second end releasably connected to the other of the riser top body and outrigger.
