Claims

1. A method comprising casting concrete against the particle layer comprising synthetic polymer granules of a waterproofing membrane, comprising: a carrier sheet layer having two major faces; a waterproofing adhesive layer attached against a major face of the carrier sheet layer; and, disposed against or partially-embedded within the waterproofing adhesive layer, a particle layer comprising synthetic polymer granules.

2. A waterproofed assembly comprising concrete cast against the particle layer comprising synthetic polymer granules of a waterproofing membrane, comprising: a carrier sheet layer having two major faces; a waterproofing adhesive layer attached against a major face of the carrier sheet layer; and, disposed against or partially-embedded within the waterproofing adhesive layer, a particle layer comprising synthetic polymer granules.
