Claims

1. A packed set of playing cards comprising:

one or more shuffled decks of playing cards, each of the playing cards including at least a rank or suit configured to be detected;

a package that includes the one or more shuffled decks of playing cards, wherein the one or more shuffled decks of playing cards passed an inspection using one or more processors during or after shuffling of the playing cards such that the one or more shuffled decks of playing cards is determined to be free of a defect comprising at least one of:

an excess or deficiency in the rank and suit combinations; or

a deficiency in a predetermined number of multiple cards; and

a shuffled card ID associated with the one or more shuffled decks of playing cards is provided with the package.

2. The packed set of playing cards according to claim 1, wherein the one or more shuffled decks of playing cards are randomly shuffled.

3. The packed set of playing cards according to claim 1, wherein the defect does not comply with predetermined card standards.

4. The packed set of playing cards according to claim 1, wherein the shuffled card ID is registered in a database by being associated with a product type of the one or more shuffled decks of playing cards or customer information.

5. The packed set of playing cards according to claim 1, wherein the shuffled card ID represents a bar code or a two dimensional matrix code.

6. The packed set of playing cards according claim 1, wherein the shuffled card ID is attached to a sealing label of the package.
