Abstract

Dishwasher mini

Dishwasher mini is a dishwashing machine for efficient cleaning and removal of oily food residues from dishes and cutlery, as hot and low-pressurized water is used, cleaning may be done without use of detergent.
Dishwasher mini includes a main unit for generating and supplying hot water, and an associated pistol-shaped sprayer with a double layers silicone hose and remote control cable attached.
Two drawings attached for illustration.
Drawing 1 of 2 outlines composition of dishwasher mini.
Drawing 2 of 2 outlines functional block of dishwasher mini with claims.
