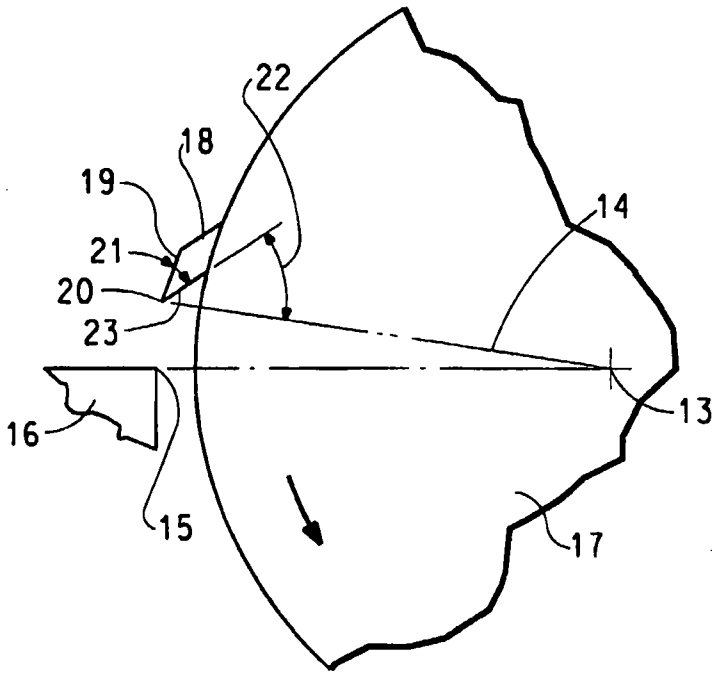
(54) Title: POLYMER CUTTING APPARATUS AND METHOD



(57) Abstract: A polymer cutter with a rotary cutting head (17) in which the cutting edges (20) are on the circumferential periphery of the head is described. The knife blades (18) on the rotary head have a knife angle (22) (as defined) of about 40° to about 60°. The apparatus is especially useful for cutting hard and/or brittle thermoplastics and may be used for preparing polymer granules or pellets.
