CLAIMS

1. A pharmaceutical composition for oral administration comprising 6-(4,4-dimethylcyclohexyl)-4-[(1,1-dioxo-1λ^6-thiomorpholin-4-yl)methyl]-2-methylthieno[2,3-d]pyrimidine or a pharmaceutically acceptable salt thereof, and a water-swellable substance, wherein the water-swellable substance is low substituted hydroxypropylcellulose.

2. The pharmaceutical composition for oral administration according to claim 1, wherein the water-swellable substance with respect to a weight of 6-(4,4-dimethylcyclohexyl)-4-[(1,1-dioxo-1λ^6-thiomorpholin-4-yl)methyl]-2-methylthieno[2,3-d]pyrimidine or a pharmaceutically acceptable salt thereof is 20% by weight to 6000% by weight.

3. The pharmaceutical composition for oral administration according to any one of claims 1 and 2, wherein the pharmaceutical composition for oral administration is selected from the group consisting of a tablet, a capsule, a granule, and a powder.

4. Use of a water-swellable substance in the manufacture of a stable pharmaceutical composition for oral administration comprising 6-(4,4-dimethylcyclohexyl)-4-[(1,1-dioxo-1λ^6-thiomorpholin-4-yl)methyl]-2-methylthieno[2,3-d]pyrimidine or a pharmaceutically acceptable salt thereof, wherein said water-swellable substance is low substituted hydroxypropylcellulose.
