

ABSTRACTPROTECTIVE SLEEVE FOR BEVERAGE CANS

5 The invention relates to a protective sleeve for beverage
cans, of the type used as a hygienic protector that can be
applied individually to each container, said sleeve
including horizontal tearing means for accessing the pull
ring of the can and vertical tearing means in the form of
10 a pre-punched longitudinal strip. The sleeve is
characterized in that it comprises a tubular body provided
with a shaped base and, at the opposite end, an upper
body, said sleeve being made from a strong, waterproof,
printed material, having a similar configuration to the
15 can and, optionally, including information in braille.
