(54) Title: AN INTELLIGENT SERVICE ROBOT

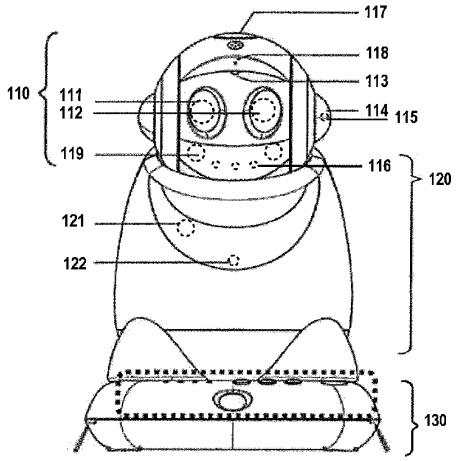

Fig.1

(57) Abstract: An intelligence service robot comprises a robot head (110) with an eye region (111) behind which is provided at least one image capturing device (112) for detecting a face of a subject and with a sound acquisition device (113) configured to acquire a voice input of the subject; a robot body (120) configured to support the robot head (110), wherein the robot head (110) is attached with the robot body (120) and rotatable around at least two axes to provide a movement response to the subject, and the robot body (120) further has a speaker (121) arranged therein for providing a sound response to the subject; a robot base (130) configured to support the robot body (120); a driving motor configured to drive the robot head (110) to rotate around the at least two axes; and an emotional display lamp configured to provide emotional indication information through lighting in a predetermined pattern. These emotional display lamps could provide a better emotional indication, which increases the cuteness of the intelligence service robot and thus a
