CLAIMS

1. A fishing rod comprising:

a rod;

a fixed hood and a floating hood into which reel legs of a reel are inserted;

a reel seat through which the rod is inserted; and

a cylindrical body that is attached to an end of the reel seat and serves as a grip,

wherein the cylindrical body is attached to an outer peripheral surface of the end of the reel seat; and

wherein the cylindrical body comprises:

a main body portion attached to the outer peripheral surface of the end of the reel seat; and

a hollow extension portion being integrally formed with the main body portion and reducing in diameter in a direction away from the reel seat, the entire hollow extension portion being separated from the rod; and

wherein the main body portion is adhesively bonded to an outer periphery of the fixed hood.

2. The fishing rod according to claim 1, wherein the cylindrical body is formed of metal.

3. The fishing rod according to claim 1,

wherein the reel seat comprises a central portion and the end at an edge of the central portion,

the end of the reel seat is smaller in diameter than the central portion to form a step surface, and

an outer peripheral surface of the main body portion of the cylindrical body and an outer peripheral surface of the central portion of the reel seat are flush with each other by attaching the cylindrical body to the step surface.

4. The fishing rod according to claim 1, wherein an opening opened to a side is formed in the hollow extension portion.
