S71 On the basis of a human-computer interaction mode, collect a first natural language indicating an application launch service intent

S72 Input the first natural language into a large AI network model to obtain a target network activation scheme

S73 Perform simulation evaluation on the target network activation scheme

S74 After a simulation evaluation result satisfies a preset condition, activate a network according to the target network activation scheme

(57) **Abstract:** The embodiments of the present application relate to the technical field of artificial intelligence (AI). Provided are a network activation method and apparatus for application launch, and a device and a medium. The method comprises: on the basis of a human-computer interaction mode, collecting a first natural language indicating an application launch service intent; inputting the first natural language into a large AI network model to obtain a target network activation scheme; performing simulation evaluation on the target network activation scheme; and after a simulation evaluation result satisfies a preset condition, activating a network according to the target network activation scheme. Using the technical solution provided in the embodiments of the present application, the capability for understanding user service-level intents can be enhanced, the capability for extending intent collection can be improved, and the adaptability to scenarios and networking can be boosted.

(57) 摘要: 本申请实施例提供了一种应用上线的网络开通方法、装置、设备及介质，涉及人工智能技术领域，该方法包括：基于人机交互方式，采集指示应用上线业务意图的第一自然语言；将第一自然语言输入AI网络大模型，得到目标网络开通方案；对目标网络开通方案进行仿真评估；在仿真评估结果满足预设条件后，按照目标网络开通方案，开通网络。应用本申请实施例提供的技术方案可以增加用户业务级别的意图的理解能力，提高意图采集的扩展能力，以及提高对场景和组网的适配能力。
