ABSTRACT

AIR MANAGEMENT IN A FLUID EJECTION DEVICE

One exemplary fluid ejection device (204) includes a substrate (324) having one or more layers positioned thereon. The fluid ejection device (204) also includes a fluid-feed path (326) extending through a space which is defined, at least in part, by the one or more layers. The fluid ejection device including methods and structures for managing air and amongst other things gas bubble formation.
