(54) Title: DEFLECTOR ARRANGEMENT FOR A TRACKED VEHICLE

Fig. 2

(57) Abstract: The present invention relates to a deflector arrangement (D) for a tracked vehicle (V). Said tracked vehicle (V) comprises a vehicle body (5) and a left and right track assembly (T1, T2) for supporting said vehicle body. The respective track assembly (T1, T2) comprises two end wheel members (W1, W2), a plurality of road wheels (W3) there between, and an endless track (4) disposed around said end wheel members (W1, W2, W3). One of the end wheel members (W1, W2) is a drive wheel member (W1) and the other is a tension wheel member (W2). Said deflector arrangement (D) is associated with an end wheel member (W1, W2). Said deflector arrangement (D) comprises a deflector member (100) being arranged and fixedly attached in connection to said inner side (W2i) of an end wheel member (W1, W2) so as to reduce ingestion of undesired material from the ground (G) into said track assembly (T1, T2). The present invention also relates to a tracked vehicle (V) comprising at least one such deflector arrangement (D).
