Title: Education related services in the Sharing Economy

Technical Field: The present invention generally relates to a method to allow people who are willing to share their knowledge, skills and information with other people who may need their services at a price that is mutually acceptable by both but driven by the recipient of the service.

Background: The education system online and off line is driven mostly by prices set by businesses. The learner has to pay a price that has been offered to them and has little choice in the matter.

Disclosure of Invention: The invention here is to patent the method of providing previously agreed to services at a price quoted by the buyer and agreed to by the seller. The recipient of the service may avail of the service either online or offline.

Specification Example related to Education:

1. Buyer picks a seller to converse with based on specific requirements.
2. Target audience:
    a. People (buyers) who want to practice conversation in a language of their choice, at a time of their choice and at a rate of their choice.
    b. Qualified People (Sellers) through pre-approved verification from all over the world who want to provide services during their available time.
3. Match occurs based on meeting both the parties' requirements.

Detailed Example related to the above:

Sample Buyer Scenario	Sample Seller scenario
1. Buyer picks a topic of conversation, language of conversation and duration. 2. Buyer pick the type of Seller (Native/Non Native) 3. Buyer picks the time 4. Buyer suggests the rate 5. Buyer enters his requirements based on the above into the appropriate digital related media to seek a match.	1. Seller uploads the topics able to converse in accordance with a pre-approved topic list. 2. Seller uploads information about his qualifications. 3. Seller pre-selects his available time 4. Seller chooses his rate 5. Seller enters his requirements based on the above into the appropriate digital related media to seek a match.

Claim: A method for obtaining the mutually acceptable price between a buyer and a seller to comprising:

a) Providing pre-assigned services available to said buyer to clearly demonstrate what said buyer will be purchasing.
