# ANTIFOULING COATING COMPOSITION, ANTIFOULING COATING FILM FORMED BY USE OF THE COMPOSITION, COATED OBJECT HAVING THE COATING FILM THEREON, AND METHOD OF ANTIFOULING TREATMENT BY FORMING THE COATING FILM

## ABSTRACT

The present invention provides an antifouling coating material which can be used to form an antifouling coating film excellent in long-term antifouling performance and physical properties, and which is excellent in long-term storage stability. The present invention provides an antifouling coating composition containing a copolymer [A] obtained by copolymerizing a monomer represented by a general formula (1) (wherein, X represents acryloyloxy, methacryloyloxy, crotonoyloxy, or isocrotonoyloxy, $R^1$ represents a hydrogen atom or methyl, and $R^2$ represents an alkyl group having a carbon number of 1 to 6), and a polymerizable monomer represented by a general formula (2) (wherein, $R^3$ represents a hydrogen atom or methyl, $R^4$ represents an alkyl group having a carbon number of 1 to 10, or an alkyl group having a carbon number of 2 to 5 to which an alkoxy group having a carbon number of 1 to 4 is bonded.).
