CLAIMS:

1. A page display method for an application, comprising:

receiving a play instruction for multimedia content in the application; and

in response to the play instruction, in a case that the multimedia content belongs to a preview stream of an online live broadcast, playing the multimedia content and displaying real-time information of the online live broadcast,

wherein the real-time information of the online live broadcast comprises at least one of a live broadcast commentary or a live broadcast explanation;

wherein the method further comprises:

displaying guidance information of the online live broadcast, wherein the guidance information is used to guide a user to enter the online live broadcast; and

after a second preset duration, updating the guidance information.

2. The method according to claim 1, further comprising:

displaying basic information of the online live broadcast in a fixing manner, and displaying the real-time information of online live broadcast in a scrolling manner,

wherein the basic information of the online live broadcast comprises at least one type of a follow tag, an anchor nickname, or a live broadcast title.

3. The method according to claim 2, wherein the basic information of the online live broadcast is displayed above or below the real-time information of the online live broadcast.

4. The method according to any one of claims 1 to 3, further comprising:

displaying extended information of the online live broadcast in a fixing manner and displaying the real-time information of online live broadcast in a scrolling manner, and after a first preset duration, displaying the real-time information of the online live broadcast and the extended information of the online live broadcast in the scrolling manner; or

displaying the real-time information of the online live broadcast and the extended information of the online live broadcast in the scrolling manner,

wherein the extended information of the online live broadcast comprises at least one of a live broadcast location, an anchor age, live broadcast time, or a live broadcast theme.

5. The method according to claim 1, wherein the guidance information comprises a guide icon and a guide text, and

after the second preset duration, updating the guidance information comprises:

after the second preset duration, updating a style of the guide icon and content of the guide text based on a type of the online live broadcast.

6. The method according to any one of claims 1 to 5, further comprising:

playing a live stream of the online live broadcast after receiving a viewing instruction for the online live broadcast.

7. A page display apparatus for an application, comprising:

a receiving module, configured to receive a play instruction for multimedia content in the application; and

a processing module, configured to, in response to the play instruction, in a case that the multimedia content belongs to a preview stream of an online live broadcast, play the multimedia content and display real-time information of the online live broadcast,

wherein the real-time information of the online live broadcast comprises at least one of a live broadcast commentary or a live broadcast explanation;

wherein the processing module is further configured to:

display guidance information of the online live broadcast, wherein the guidance information is used to guide a user to enter the online live broadcast; and

after a second preset duration, update the guidance information.

8. An electronic device, comprising:

one or more processors;

a memory; and

one or more computer programs,

wherein the one or more computer programs are stored in the memory, and the one or more processors, when executing the one or more computer programs, cause the electronic device to implement the page display method for the application according to any one of claims 1 to 6.

9. A computer storage medium, comprising computer instructions, wherein the computer instructions, when running on an electronic device, cause the electronic device to execute the page display method for the application according to any one of claims 1 to 6.

10. A computer program product, wherein the computer program product, when running on a computer, causes the computer to execute the page display method for the application according to any one of claims 1 to 6.
