(54) Title: SIGNALING INVALID DEPTH SAMPLES

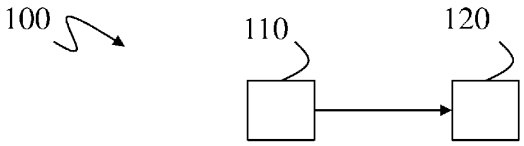

Fig. 10

(57) Abstract: The present disclosure relates to a method of signaling at least one invalid depth sample in at least one depth image, the method comprising: -obtaining (110) an invalid depth sample information representing the at least one invalid depth sample, each invalid depth sample representing a sample in the at least one depth image associated with a missing, undefined or unknown depth value; and -signaling (120), in a binary data structure, the invalid depth sample information as metadata of the at least one depth image.
