

ABSTRACT

This application discloses a method and an apparatus for handling radio link failure and relates to the field of communications technologies. The method for handling radio link failure is applied to a first terminal and includes: detecting a radio link failure between the first terminal and a second terminal; and reporting an indication message of the radio link failure to a serving base station of the first terminal, where the indication message includes at least one of the following information: an identifier of radio link, an indication of radio link failure, and a cause of the radio link failure.
