ABSTRACT

The present disclosure provides a carrier, a base, and a carrier vehicle. The carrier comprises: a compartment part, which can be placed on the base; and connecting rods, which are movably connected to the compartment part, wherein each connecting rod can move between a fitting position and a storage position, and the connecting rod can be fitted to a corresponding connecting component arranged on the base when being located at the fitting position, so that the compartment part is fixed to the base. The carrier of the present disclosure can be easily and stably fixed to the carrier vehicle by means of the base.
