Transmitting an operation command by the communication device to each of the plurality of massagers via a wireless communication
S101
transmitting a connection status update on the data communication by the massager communication unit to the each of the plurality of massagers
S103
transmitting a verification signal by the communication device to the each of the plurality of massagers at a first frequency
S105
transmitting a confirmation signal by the each of the plurality of massagers to the communication device upon receiving the verification signal
S107
transmitting an operation status update by the each of the plurality of massagers to the communication device
