Abstract of Invention

SLIDABLE LAUNDRY HANGER SYSTEM

The present invention seek to provide a system for hanging out laundry, more often wet laundry to dry, which is easily operable in addition to being safe, efficient, user friendly and convenient to use.

The object of this invention is to provide a system that can hold one or more laundry poles and allow the laundry to be hung within the confines of the high rise residential apartment, and which can then be easily moved laterally to and fro from the interior to the exterior domain of the high-rise building by sliding means. It also sought to incorporate the use of conventional hangers to hang individual articles of laundry to dry.
