(54) Title: A CONTROLLED RELEASE FORMULATION FOR POORLY SOLUBLE BASIC DRUGS

(57) Abstract

A controlled release, oral, solid, pharmaceutical composition for a reduced daily dosage regimen is described where the therapeutic ingredient is a poorly soluble basic drug. The formulation comprises the use of a water-soluble alginate salt, a complex salt of alginic acid and an organic carboxylic acid in admixture with the therapeutic drug. A particular embodiment comprising a once a day dosage form for clarithromycin is also described.
