(54) Title: SHAVING AID GEOMETRY FOR WET SHAVE SYSTEM

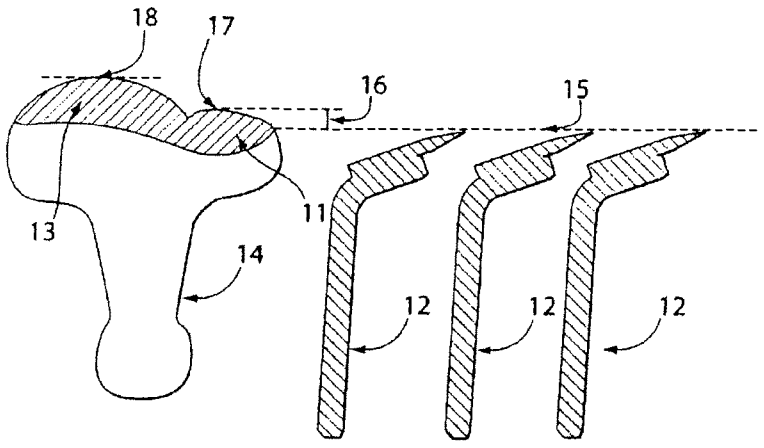

Fig. 3

(57) Abstract: The invention discloses a novel geometry for a lubricating body, strip or cap (14), composed of shaving aids, taking into consideration their shape, materials and placement along with their interaction with multiple blades (12) for improved shaving attributes in a wet shaving system. A strip exposure (16) and a strip angle (22) are disclosed where generally a maximum height of the lubricating strip is greater than or equal to the maximum height of the blade plane (15) and thus, the skin contacting surface of the lubricating body is generally above the skin contacting surface of the blades.
