CLAIMS

[Claim 1]

A wiper blade comprising a wiper portion having a lip portion (7) sliding on a surface of the vehicle windshield for wiping the surface of the windshield, and a rainwater reserving portion (10) formed on one side surface of a tip end portion (7a) of the lip portion (7), the rainwater reserving portion (10) being extending normally to and outwardly from one side surface of the tip end portion (7a) of the lip portion (7) and having a rearward concave surface portion (10a) so as to form a sharp tip end (10c) and a large thickness bottom portion.

[Claim 2]

The wiper blade as claimed in claim 1, wherein the rainwater reserving portions are formed on both side surfaces of a tip end portion of the lip portion, respectively.
