Method of Providing a Price Data of an Inventory Diamond and System thereof

Abstract

The present invention provides a computer implemented method and system for providing a price data of an inventory diamond in a diamond inventory database. The method includes receiving a certified diamond record from a user by a receiving module, the certified diamond record includes a diamond specification of the diamond; retrieving the diamond specification from the certified diamond record; searching a diamond inventory database in a data storage medium for an inventory diamond record based on the diamond specification; identifying the inventory diamond record in the diamond inventory database based on the diamond specification, the inventory diamond record being associated with the inventory diamond; retrieving an inventory diamond price data associated with the inventory diamond from the diamond inventory database; and providing the inventory diamond price data to the user.
