ELECTRONIC REVENUE STAMP ISSUING APPARATUS AND METHOD THEREOF AND RECORDING MEDIUM STORED CONTROL PROGRAM THEREOF

ABSTRACT

An electronic revenue stamp issuing apparatus (100) provides means (1) for judging whether the amount of an electronic revenue stamp to be issued is equal to or less than a possible amount to issue; means (2) for issuing the electronic revenue stamp as data with an attached signature; balance amount reducing means (3) for reducing the amount of the electronic revenue stamp from the possible amount to issue; verifying means (4), which, upon receiving a certificate making the electronic revenue stamp invalid, verifies whether the certificate is valid or not; amount increasing means (5) for increasing the possible amount to issue by the amount of the electronic revenue stamp made to be invalid; and an invalid revenue stamp recording means (6).
