

Wearable Automatic Injection Device For Controlled Delivery Of Therapeutic Agents

Abstract

5 Exemplary embodiments provide wearable automatic injection devices for subcutaneously
injecting a therapeutic agent into a patient's body at controlled rates, for example, in a single
bolus. Exemplary embodiments provide methods for assembling wearable automatic injection
devices for subcutaneously injecting a therapeutic agent into a patient's body at controlled
rates. Exemplary embodiments provide methods for using wearable automatic injection
10 devices for subcutaneously injecting a therapeutic agent into a patient's body at controlled
rates.
