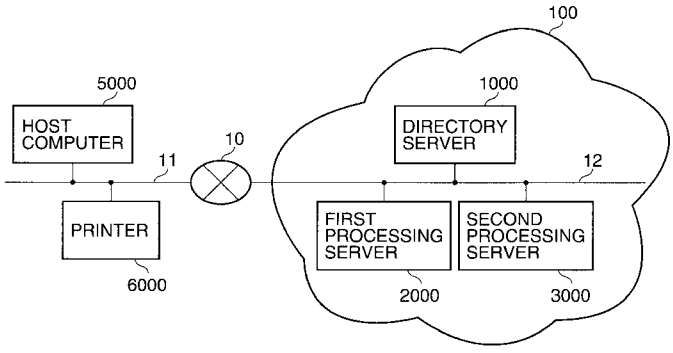
(54) **Title**: INFORMATION PROCESSING APPARATUS, METHOD OF CONTROLLING INFORMATION PROCESSING APPARATUS, PROGRAM, AND STORAGE MEDIUM

FIG.1



(57) **Abstract**: An information processing apparatus which is capable of performing printing efficiently by using a server apparatus existing on a network, such as the Internet. The information processing apparatus is communicable with the server system including a directory server 1000 and first and second processing servers 2000 and 3000, and a printer 6000. The apparatus accepts a single instruction input by a user, for instructing printing, and transmits a print job to the server system according to the single instruction, and at the same time an instruction for acquiring print data from the server system, to the printer 6000.
