(54) Title: POLYSACCHARIDE TISSUE FILLERS CROSSLINKED WITH RESVERATROL

(57) Abstract: The present invention relates to novel hyaluronic acid derivatives conjugated with tri- O-glycidylated resveratrol (*tri-O-triglycidylresveratrol*) and processes for manufacturing the same. The covalent link of said bioactive molecules to hyaluronic acids and the degree of crosslinking therewith affords special characteristics in terms of viscoelastic properties, and stabilises the resulting hyaluronic acid derivatives to chemical and enzymatic degradation. Said novel hyaluronic acid derivatives are useful for the preparation of injectable dermal filler compositions effective as soft tissue fillers, such as dermal and subdermal fillers.
