DOOR OR WINDOW SYSTEM

ABSTRACT

A door or window system (10) is provided. The door or window system (10) includes a rail (12), a first track (14) attached to the rail (12), a first panel (16), a receptacle (18) provided along a distal edge (20) of the first panel (16), a second track (22) provided along an edge (24) of the first panel (16), a second panel (26), a plurality of rollers (28) attached to the second panel (26) and a catch (30) received in the receptacle (18). The first and second tracks (14, 22) are aligned when the first panel (16) is in a closed position. The rollers (28) are operable to slide along the first and second tracks (14, 22). The catch (30) is operable to engage the rail (12) when the first panel (16) is in the closed position.
