CLAIMS

1. A wall panel comprising:
    a side panel,
    a first side sheet attached to a side surface of the side panel, and
    a front cover attached to the side panel to cover a front surface of the side panel and a front edge of the first side sheet,
    wherein the first side sheet is attached to an external surface of the side panel and the front cover comprises an external flange covering the front surface of the side panel, the front edge of the first side sheet and a seam between the side panel and the first side sheet.

2. The wall panel as recited in claim 1, wherein the side panel has a pair of outer walls spaced apart from each other and a rib joining the outer walls to form a cavity between the outer walls, and an opening facing the front cover, wherein the front cover has a main body, a pair of spaced apart ridges extending perpendicularly from the main body, the pair of ridges inserted into the opening to fix the front cover to the side panel.

3. The wall panel as recited in claim 1, wherein the wall panel is made of aluminium material.

4. The wall panel as recited in claim 1, further comprising a second side sheet attached to an internal surface of the side panel, wherein the front cover comprises an internal flange covering the front surface of the side panel, a front edge of the second side sheet and a seam between the side panel and the second side sheet.

5. The wall panel as recited in claim 1, wherein the side sheet is formed with a structure and/or appearance different from the side panel.
