CLAIMS

1. A composition comprising:

one or more isolated probiotic bacterial strains; two or more active of the one or more isolated probiotic bacterial strains; or the combination of one or more isolated probiotic bacterial strains and two or more active of the one or more isolated probiotic bacterial strains, and

an acceptable carrier,

in which the one or more isolated probiotic bacterial strains and/or the two or more active of the one or more isolated probiotic bacterial strains is capable of inhibiting fungal proliferation, in which the composition comprises a pH below 6.5.

2. A composition according to Claim 1, in which the composition comprises nucleic acid and/or nucleotides.

3. A composition according to Claim 1 or 2, in which the composition has a pH value below pH 5.5.

4. A composition according to Claim 1, 2 or 3, in which the at least two actives are produced by metabolism of the isolated viable probiotic bacterial strain.

5. A composition according to any preceding claim, in which the least two actives are produced by a single isolated probiotic bacterial strain.

6. A composition according to any preceding claim, in which the actives are selected from a bacteriocins, an organic acid, a cell wall material, or a combination hereof.

7. A composition according to any preceding claim, for use in the prevention and/or treatment of mycoses and/or dandruff in a human or in an animal.

8. A composition according to Claim 7, in which the prevention and/or treatment of mycoses and/or dandruff in a human or in an animal is prevention and/or treatment of conditions associated with the proliferation of yeasts of the Malassezia genus on a scalp, on hands, on ears, on feet, on nails or on skin of a subject.

9. A topical hair care composition comprising a combination of a composition according to any preceding claim and a shampoo matrix with pH below 6.5 comprising at least one

detersive surfactant selected from the group consisting of an anionic surfactant, a nonionic surfactant, an amphoteric surfactant, or a combination thereof.

10. A composition according to any preceding claim, in which the composition comprising viable probiotic bacteria in a concentration from 10^3 to 10^{13} colony forming units of bacteria per gram.

11. A composition according to any preceding claim, in which the composition comprises a pH in the range of 3.5-5.5.

12. A composition comprising:

one or more isolated viable probiotic bacterial strains, and

an acceptable carrier,

in which the one or more isolated probiotic bacterial strains is capable of inhibiting fungal proliferation, in which the composition is formulated into a powder.

13. A composition according to Claim 12, for treatment of dandruff and/or mycosis in which the composition comprises viable probiotic microorganisms in at least a concentration of 10^3 colony forming unit per gram of composition in which the probiotic microorganism is able to produce anti-dandruff and/or anti-mycosis actives.

14. A composition according to Claim 12, in which the composition is a dry-shampoo.

15. A composition according to Claim 12, which is for scalp treatment, skin treatment and diaper rash.
