DOCUMENT PROCESSING METHOD, DEVICE, AND STORAGE MEDIUM

ABSTRACT

Embodiments of this specification provide a document processing method, a device, and a storage medium. In the method, an electronic device obtains a document image corresponding to a target document; processes the document image based on an end-to-end model that can obtain information based on the document image, to obtain document information corresponding to the target document; and performs a target operation based on the document information. The document information includes at least one of key information in the target document and association information related to the target document.
