Claims

1. A deodorizing composition comprising at least one zinc carboxylate salt and aluminium chlorohydrate, wherein the at least one zinc carboxylate salt is selected from the group consisting of zinc neodecanoate and zinc acetate.

2. The deodorizing composition according to claim 1, wherein the at least one zinc carboxylate salt is zinc neodecanoate.

3. The deodorizing composition according to claim 1 or 2, comprising the at least one zinc carboxylate salt in a concentration of from about 1% by weight to about 100% by weight, more preferably from about 1% by weight to about 20% by weight, and most preferably from about 2% by weight to about 8% by weight.

4. The deodorizing composition according to one of claims 1 to 3, comprising the at least one zinc carboxylate salt and aluminium chlorohydrate in a weight ratio of from about 2:1 to about 1:10, more preferably in a weight ratio of from about 1.5:1 to about 1:5, and most preferably in a weight ratio of from about 1:1 to about 1:2.

5. The deodorizing composition according to one of claims 1 to 4, further comprising an at least essentially anhydrous solvent.

6. The deodorizing composition according to one of claims 1 to 5, further comprising at least one fragrance ingredient, preferably at least five, more preferably at least 10, and most preferably at least 20 fragrance ingredients.

7. The deodorizing composition according to claim 6, wherein the at least one fragrance ingredient is preferably selected from the group consisting of 3,7-dimethyloct-6-enal, e.g. Citronellal; 3,7-dimethyloct-6-en-1-ol, e.g. Citronellol; 2,4-dimethylcyclohex-3-enecarbaldehyde, e.g. Cyclal C; (E)-dec-4-enal; ethyl 2-methyl butyrate; 1-phenylethyl acetate, e.g. Gardenol; (Z)-hex-3-en-1-yl acetate; hexyl acetate; isoamyl acetate; Litsea cubeba oil; Nonanal; Orange oil; Orange terpenes; prenyl acetate; 4-methyl-2-(2-methylprop-1-en-1-yl)tetrahydro-2H-pyran, e.g. Rose Oxide; 4-methylene-2-phenyltetrahydro-2H-pyran, e.g. Rosyrane super; 2,4-dimethylcyclohex-3-enecarbaldehyde; e.g. Tricyclal; 2,6,10-trimethylundec-9-enal, e.g. Adoxal; Armoise oil Morocco; 8-(sec-butyl)-5,6,7,8-tetrahydroquinoline, e.g. Bigaryl; (2E)-3-phenylprop-2-

enal, e.g. Cinnamic aldehyde; (E)-3,7-dimethylocta-2,6-dienal, e.g. Citral; ethyl caproate; 1,3,3-trimethyl-2-oxabicyclo[2.2.2]octane, e.g. Eucalyptol; Eucalyptus, e.g. globulus oil China; 1-(1,2,8,8-tetramethyl-1,2,3,4,5,6,7,8-octahydronaphthalen-2-yl)ethanone, e.g. Georgywood; hexyl isobutyrate; (E)-4-(2,6,6-trimethylcyclohex-1-en-1-yl)but-3-en-2-one, e.g. Ionone beta; isobutyl isobutyrate; isobutyl quinolone; isopropyl methyl-2-butyrate; (2E,6Z)-3,7-dimethylnona-2,6-dienenitrile, e.g. Lemonile; 3,7-dimethylocta-1,6-dien-3-ol, e.g. Linalool; 2,6-dimethylhept-5-enal, e.g. Melonal; methyl amyl ketone; methyl benzoate; methyl heptenone; methyl hexyl ketone; phenyl ethyl acetate; tetrahydro myrcenol; Patchouli Oil; tridecen-2-nitrile; 6-methoxy-2,6-dimethyloctanal, e.g. Calypsone; 5-tert-butyl-2-methyl-5-propyl-2H-furan, e.g. Cassyrane; (4E)-9-hydroxy-5,9-dimethyl-4-decenal, e.g. Mahonial; 1-methyl-2-(5-methylhex-4-en-2-yl)cyclopropyl)methanol, e.g. Rosyfolia; 3-(4-isobutyl-2-methylphenyl)propanal, e.g. Nympheal; and mixtures thereof.

8. A deodorant consumer product comprising the deodorizing composition according to one of claims 1 to 7.

9. The deodorant consumer product according to claim 8 in the form of an aerosol.

10. A method of suspending aluminium chlorohydrate in an at least essentially anhydrous solvent, wherein at least one zinc carboxylate salt is added, wherein the at least one zinc carboxylate salt is selected from the group consisting of zinc neodecanoate and zinc acetate.

11. A method of preventing clumping of aluminium chlorohydrate in a deodorizing composition or a deodorant consumer product, wherein the deodorizing composition or deodorant consumer product is provided with at least one zinc carboxylate salt, wherein the at least one zinc carboxylate salt is selected from the group consisting of zinc neodecanoate and zinc acetate.

12. A method of preventing clogging of a nozzle of a deodorant spray containing a deodorizing composition, said a deodorizing composition comprising aluminium chlorohydrate, wherein the deodorizing composition is provided with at least one zinc carboxylate salt, wherein the at least one zinc carboxylate salt is selected from the group consisting of zinc neodecanoate and zinc acetate.

13. The method according to one of claims 10 to 12, wherein the at least one zinc carboxylate salt is zinc neodecanoate.

14. The method according to one of claims 10 to 13, wherein the at least one zinc carboxylate salt is provided in an amount to obtain a concentration of the at least one zinc carboxylate salt in the deodorizing composition or deodorant consumer product of up to about 20 wt %, more particular 2 to 10 wt %, more particularly still about 2 to 5 wt %.
