[CLAIMS]

[Claim 1]

A brassiere, in which a pad is provided in each of a pair of cup parts having a face fabric and a lining fabric and covering a bust, comprising:

a plurality of first connection parts having a fixed length,

wherein the pad is accommodated in a space formed between the face fabric and the lining fabric, and a circumference of the pad including a lower side is connected to three or more end portions of the cup part including end portions on the upper side and the lower side via only the plurality of first connection parts so that the pad is not fixed to the face fabric and the lining fabric except for the end portions, and

the plurality of first connection parts are elastic members.

[Claim 2]

The brassiere according to claim 1,

wherein the pad connected to the cup part is movable in a front-rear direction with respect to a wearer of the brassiere.

[Claim 3]

The brassiere according to claim 1,

wherein the plurality of first connection parts are sewn to the pad and the cup part.

[Claim 4]

The brassiere according to claim 1, comprising:

a second connection part having a fixed length,

wherein the pads are connected to each other via the second connection part.

[Claim 5]

The brassiere according to any one of claims 1 to 4,

wherein the plurality of first connection parts are disposed at positions in which a distance of a perpendicular line from a center of a line connecting two adjacent first connection parts to an edge of the pad is 1 cm or less.
