I CLAIM:

1. A tool for the postproduction of a wall surface into exposed concrete, comprising:

a tubular main body being an elastic element made of a water absorbing material; and

a spreading layer, fully covering ~~an outside of~~ said tubular main body, being ~~formed with sprayed powder paste mixed with a synthetic rubber emulsion and a blended mortar with the synthetic rubber emulsion with trowels.~~

~~2. The tool according to claim 1, wherein said spreading layer is~~ made of ~~silk or~~ unwoven material, wherein the tool alters a wall painting to an exposed concrete.

~~3. The tool according to claim 1, wherein the spreading layer further comprises a coloration layer.~~

~~4. The tool according to claim 3, wherein the coloration comprises a cement mixed with a coloring pigment.~~

2. The tool for the postproduction of a wall surface into exposed concrete as set forth in Claim 1, wherein the elastic element is made from sponge or foam.
